SAFESCAN 2680
SOFTWARE UPDATE INSTRUCTIONS

Part number 112-0480

This instruction guides you through the €20 software update for your 2680 Banknote Counter. Please follow the instructions step by step to ensure a proper update of your machine.

IMPORTANT PREPARATIONS

1 Please check the **part number** on the product label located at the rear of the device, and ensure you install the correct software version for your specific model !

Model	Part number	Correct software version
Safescan 2680	112-0480	C43-01

2 **This update is meant to be performed via USB**. This means the Safescan 2680 has to be connected to your PC via a USB cable. The USB connection is located at the **backside** of the Safescan 2680.
The USB cable to be used is a so-called **USB A (Male) to USB A (Male) cable**. In case you don't have this type of cable, you can order it on **www.safescan.com**
❸ Before updating your banknote counter, **please ensure that your device and the internal sensors have been properly cleaned and are free of dust**. Cleaning Cards are available at **www.safescan.com**. Dust is best removed using pressurized air, for example from an air-duster spray can.

❹ If your PC runs Windows 7 or higher, your Safescan device should automatically be recognized (as "Prolific USB-to-Serial Comm Port"). This can be checked in the Windows Device Manager. If your computer does not recognize your Safescan device, you will see a yellow exclamation mark next to "USB-to-Serial Comm Port". In this case, please install the **device driver** for either Windows XP/Vista/7 or Windows 8/10 on your PC.

= OK

= DRIVER NEEDED

> • To download the driver and installation instruction for **Windows XP / Vista / 7**, click **here**
> • To download the driver and installation instruction for **Windows 8 / 10**, click **here**

❺ The update consists of **2 steps**:
- **STEP 1:** Updating the Main Board software
- **STEP 2:** Updating the Receiver Board software

Please note that all 2 steps must be performed!

❻ A video showing the complete update procedure can be viewed by clicking **here**
*Please note that for this model the LCD Panel update is not needed (!)*

## GO TO **STEP 1** OF THE UPDATE PROCEDURE →

1.1   **Switch off** your Safescan 2680

1.2   Connect the Safescan 2660 to a PC with
       a USB-A (Male) to USB-A (Male) cable.

To device

       This cable is available in the online shop at
       www.safescan.com.

To PC

1.3.   Open the software: **Safescan update tool.exe**

1.4   Make sure **[Mainboard]** is selected, and click **[Load file]**

1.5   Browse to the location where you have placed the update files, and select the **Mainboard
       update file** (**S2680_Mainboard_C43-xx.EUP**).

1.6   **Press and hold** the blue **[RESET]** button and **switch on** the banknote counter.
       The display will show **[DOWNLOADING PLEASE WAIT...]**

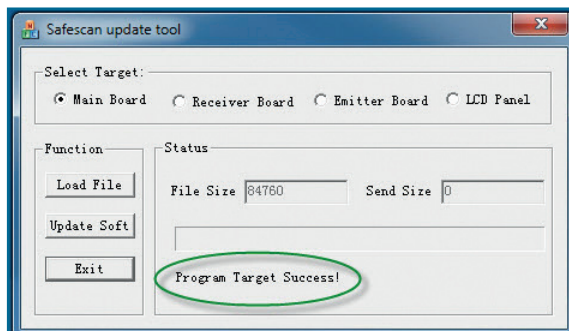

DOWNLOADING
PLEASE WAIT......

1.7   Click **[Update Soft]** to upload the software to the device. The update tool will show a progress bar.

If the message **[Can't find available device]** appears, please install the driver for Windows XP/Vista/7 or Windows 8/10 on your PC and repeat the update procedure.

- To download the driver and installation instruction for **Windows XP / Vista / 7**, click **here**
- To download the driver and installation instruction for **Windows 8 / 10**, click **here**

1.8   When the update has finished (100%), the software will show **[Program Target Success!]**.

1.9   The banknote counter will automatically restart.
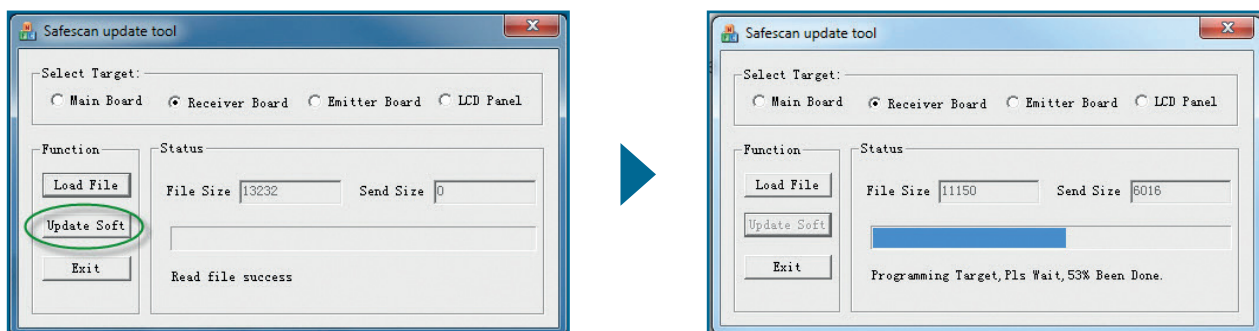

PROCEED WITH **STEP 2** OF THE UPDATE PROCEDURE →

Make sure that your Safescan 2680 is **switched on** and that it is still **connected to the PC** with the USB-A (Male) to USB-A (Male) cable.

2.1 In the **Safescan update tool** select **[Receiver Board]** and click **[Load file]**

2.2 Browse to the location where you have placed the update files, and select the **Receiver Board update file** (**S2680_ReceiverBoard.EUP**).

2.3 Click **[Update Soft]** to upload the software to the device. A progress bar will be shown.

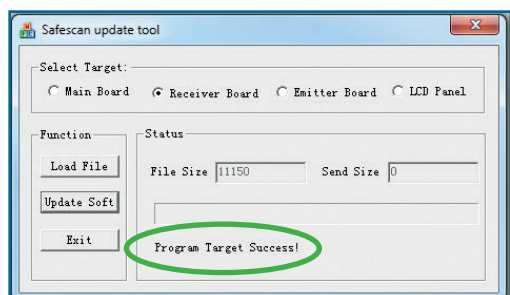

The display will show **[DOWNLOADING MIR]**.

Downloading MIR

2.4 When the update has finished (100%), the software will show **[Program Target Success!]**. After this, the display of the banknote counter will go blank.

2.5 **Switch off** the banknote counter

THE UPDATE IS NOW READY
