

# Everlasting Assurance

Cash handling products for your business  
Durable and intelligent, Safescan products help  
protect your business. Without you even noticing.

# We create security and efficiency products that last.

Do we really notice when we feel assured?

That sense of stability, confidence and control. Subtle, yet essential. Or do we only become aware of it when it's not there? When the tools we rely on to maintain that feeling prove unreliable.

At Safescan, we create security and efficiency products. Designed to last. We understand quality is defined by details. Whether it's in our products or in how you run your business. A keen eye makes all the difference.

We carefully craft for durability and intelligence. Ensuring that everyday interactions are consistently safe and smart. This provides you with the peace of mind to do what you do best.

Without you even noticing it.

Safescan. Everlasting assurance.

# Products that support your business. Year after year.

**Durable products**  
that are built to last.

**Proven accuracy**  
tested at central banks.

**Future-proof technology**  
with free currency updates.

**Professional service**  
by our expert customer care team.

Cash handling products  
for your business

# Illuminate the invisible

Instantly spot fakes with our UV detectors. The Safescan 50 and Safescan 70 offer bright ultraviolet detection. Making it easier for you to accurately verify banknotes, credit cards, passports, driving licenses, and more. The Safescan 70 even has an additional white light that illuminates hidden watermarks and microprints. Providing you with flexible three-point counterfeit detection that you can trust.

A great deal, in a small package.

The powerful 9W lamp illuminate hidden ultraviolet features.

The large white light area highlights watermarks and microprints.

The auto start / standby feature saves time and energy.

The warm start technology triples the durability of the bulb.

# The Ultimate Protection

Never accept counterfeits again. Our automatic counterfeit detectors accurately verify your banknotes on up to seven security features. In less than half a second, you will know - without a doubt - if the banknote in your hand is real or not. So you can focus on what matters most, your customers.

The foundation of a safer business.

Verifies banknotes on up to seven security features.

Counts banknotes with the handy add function.

Fits perfectly on even the smallest counters.

Supports portable use with the optional battery.

# Fast. Easy. Accurate.

Simplify your cash counting process and avoid time-consuming mistakes. Our intelligent banknote counters - with counterfeit detection - quickly and accurately count all your banknotes. No matter if you need to count small or large stacks, sorted or unsorted notes. Safescan offers the perfect banknote counter for your business.

A wide range of products. Made for you.

# Optimal Efficiency

Still counting your cash by hand? No more! The Safescan 2865-S makes easy work, of your work. With just the touch of your finger you can value count your banknotes, verify their authenticity, and create batches. You even get detailed notifications in your own language, so you know exactly when to separate a banknote, check your stack, or clean your device. Saving you valuable time and money.

Designed to meet your needs.

**Value counts mixed banknotes** for multiple currencies.

**Verifies banknotes** on up to seven security features.

**Creates equal stacks** with the batch function.

**Presents detailed results** per currency and denomination.

# Unlimited Possibilities

Experience the endless potential of our advanced banknote counter range. Not only do the Safescan 2985-SX and Safescan 2995-SX accurately value count and verify your banknotes, but they can also sort them based on their currency, denomination, validity, orientation, and quality. Perfect for when you need to process your cash quickly, accurately, and without interruptions.

Advanced features. At your fingertips.

**Value counts and sorts mixed banknotes for multiple currencies**

**Verifies banknotes and separates potential fakes.**

**Scans serial numbers with its high-resolution scanner.**

**Removes banknotes that are dirty or damaged.**

# Ready. Set. Go!

Save valuable time. Our intelligent coin counters count all your coins in no-time, while also sorting them per denomination and quantity. In just minutes your coins are organised and you have a complete overview of the counting results ready to print and add to your administration. All with just the push of a button.

Efficiency made easy.

# One For All

Looking for one tool that can do it all? Look no further. Our intelligent money counting scales not only value count your coins and banknotes, but also process bundled cash, tokens, and vouchers. Combine your money counting scale with our custom cash drawers and coin cups to count your cash drawer faster than ever before. All it takes is one minute.

Products that work together. Seamlessly.

Counts coins and banknotes quickly and accurately.

Counts coin bags of all denominations together.

Counts non-cash items such as vouchers and tokens.

Counts your cash drawers in just minutes.

# Flexible. Durable. Efficient.

Create your own perfect sales environment with our cash drawers and accessories. Our large assortment consists of durable, secure, and customisable cash drawers that all have their own lay-out and inserts. Making it easy to find the perfect one. Pair it with its own matching accessories or safe to further increase your security, flexibility, and efficiency.

Security that lasts.

Durable designs  
that are made to last.

Secure locks  
that keep your cash safe.

Customisable inlays  
that meet your needs.

Accessories and safes  
that complete your set-up.
