

35 PORTABLE DETECTOR

VERIFY BANKNOTES AT ANY LOCATION

Lightweight and compact, the battery-powered Safescan 35 is the perfect counterfeit detector wherever you need fast, portable verification, such as at markets and events or in taxis and delivery vans. Put banknotes through a quick yet comprehensive check on three distinct security features. Press the "MG" button on the Safescan 35 and move the magnetic head over the banknote. An audible signal confirms the note contains the expected magnetic features.

- Threefold verification (UV, magnetic characteristics and security thread) for reliable results

- Quick and easy to use
- Including neck strap

Verifies UV features of banknotes - suitable for all currencies

Verifies metal thread features of banknotes

Extremely lightweight and compact
