

TimeMoto[®]
EASY TIME & ATTENDANCE
POWERED BY THE CLOUD

SIMPLIFY EMPLOYEE MANAGEMENT

Looking for a single, easy-to-use system that can handle all your timesheet, scheduling and reporting needs? TimeMoto is the cloud-based motor that powers comprehensive attendance and scheduling system. Employees can clock in and out on any device, from any location. Advanced push technology updates all data in real time, so you instantly see who's working where right now. And because TimeMoto runs securely in the cloud, there's nothing to set up: no servers, no software, just log in and go. Employee management has never been easier.

24/7 REAL-TIME STAFF PRESENCE

TimeMoto uses push technology to instantly update employees' clocking data in the cloud. See who's in and who's out with up-to-the-minute accuracy.

24/7 REAL-TIME ACCESS IN ANY BROWSER

No matter where you are or what device you're using, a browser and an Internet connection are all it takes to access and manage your data.

ON-LOCATION CLOCKING

TimeMoto TM series of push-enabled terminals offer state-of-the-art fingerprint, face recognition and RFID clocking perfect for warehouse, manufacturing and office staff.

From your local warehouse to a project site in Dubai, TimeMoto lets you seamlessly manage a varied and mobile workforce through a single, streamlined interface.

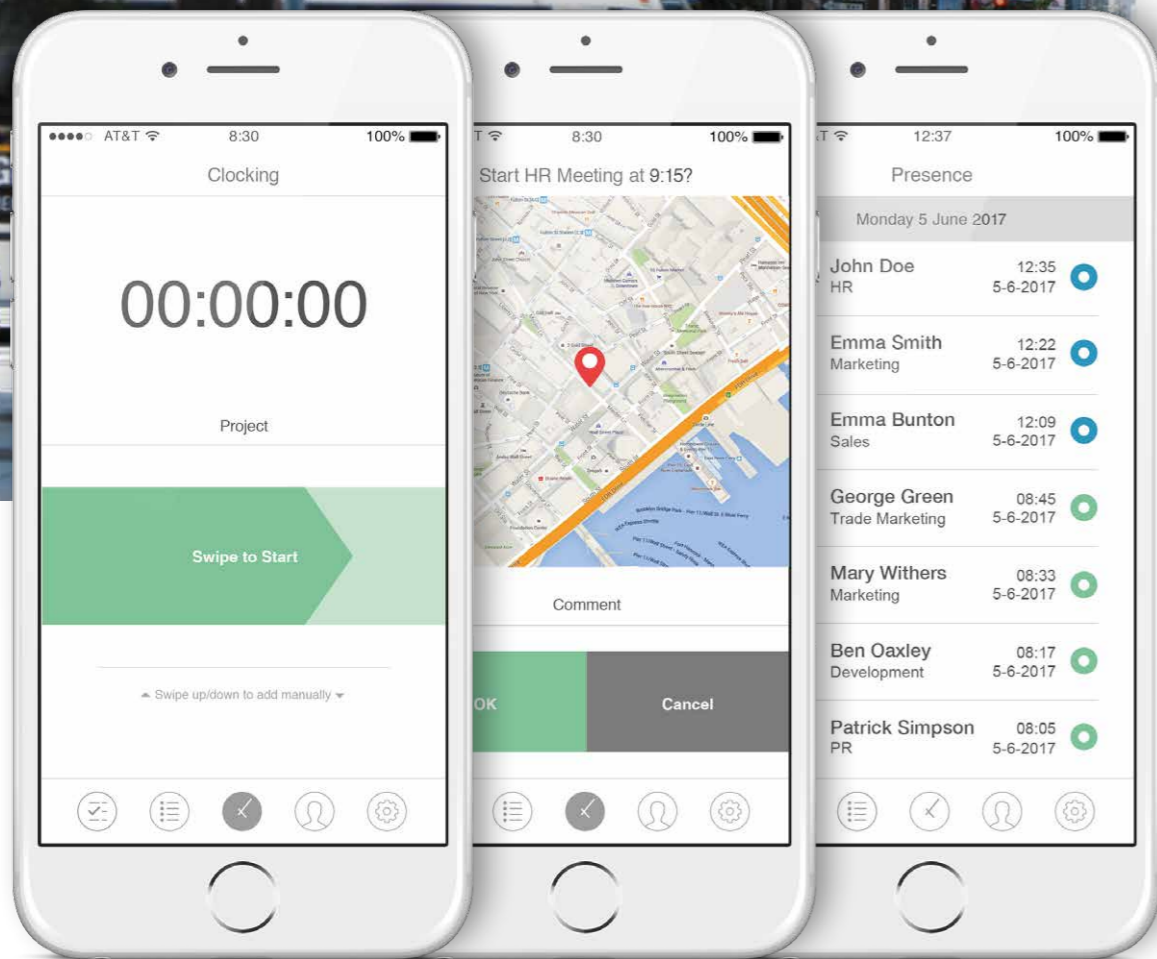

DESKTOP BROWSER CLOCKING

Employees can clock in and out from any browser on any platform—perfect for clocking work time at home or any remote location.

MOBILE APP CLOCKING

The easy-to-use TimeMoto app lets employees clock time on any phone or tablet—perfect for logging hours on the road or on site with a customer.

FAST, EASY AND ACCURATE

Whatever device you use, it only takes seconds to clock in and out. Select a project or work code and add a comment if you like, then simply press the button. Need to add time manually? No problem; you can add it in decimal or hours-and-minutes format.

Your timestamp and geolocation are securely encrypted and pushed to the cloud in real time for up-to-the-minute accuracy-and nothing ever gets lost. If you lose your internet connection, the data are stored locally until you're back online, then automatically pushed to the cloud.

EVERY TIME RECORD INCLUDES:

- Project Code
- Complete Audit Trail
- Employee Status
- Timestamp
- Geolocation
- Comments

EASILY ADD NEW SITES

Opening a new office or adding space to your warehouse? It's easy to add one or more TimeMoto terminals anywhere you need them. Simply plug the new device into your network and enable its built-in data push function. TimeMoto will automatically recognize the new device and sync all your data with it. You'll be up and running in just minutes.

ALL YOUR DATA EVERYWHERE

TimeMoto instantly updates all your devices whenever something changes. From registering a new fingerprint at an on-site terminal to editing user data from your browser at home, all your changes are automatically synchronized across your entire network.

ADVANCED SCHEDULING

TimeMoto offers two tiers of scheduling tailored to your needs.

REGULAR

For companies that work standard office hours. Create multiple predefined schedules for each employee, including start and end times, breaks, days of the week and customizable rounding rules.

FLEX

For companies that work in shifts or outside standard hours. Create dynamic work schedules for all 24 hours of the day. Manage vacations, holidays, sick leave and absences. Define preset roles and shifts preferences for each employee. Cashier called in sick or fry cook running late? Flex instantly shows you who's available and qualified to cover the gap. Automatically notify employees of their upcoming shifts and changes.

INSTANT INSIGHT FOR INSTANT ACTION

TimeMoto automatically detects irregularities in employee clocking data so you can handle them when they arise. Authorized users can easily modify time records right from the staff presence screen; your reports automatically update. TimeMoto saves the new data with the original, so there's always an audit trail to follow.

IN-DEPTH REPORTING AT YOUR FINGERTIPS

Just click to review your time data by week, month, project, department, location, customer and more. Print employee timesheets right from the screen. Export your data straight to your payroll processing software, or save it in Excel or CSV format. Want to share your report? Email it to colleagues as a PDF.

PERFECT FOR EVERY INDUSTRY

TimeMoto's power, scalability and ease of use make it an excellent solution for every industry. From hotels to hospitals, restaurants to retail chains, construction sites to car manufacturers, TimeMoto can robustly and securely handle your company's specific tracking, scheduling and reporting needs-whether you have ten employees or ten thousand.

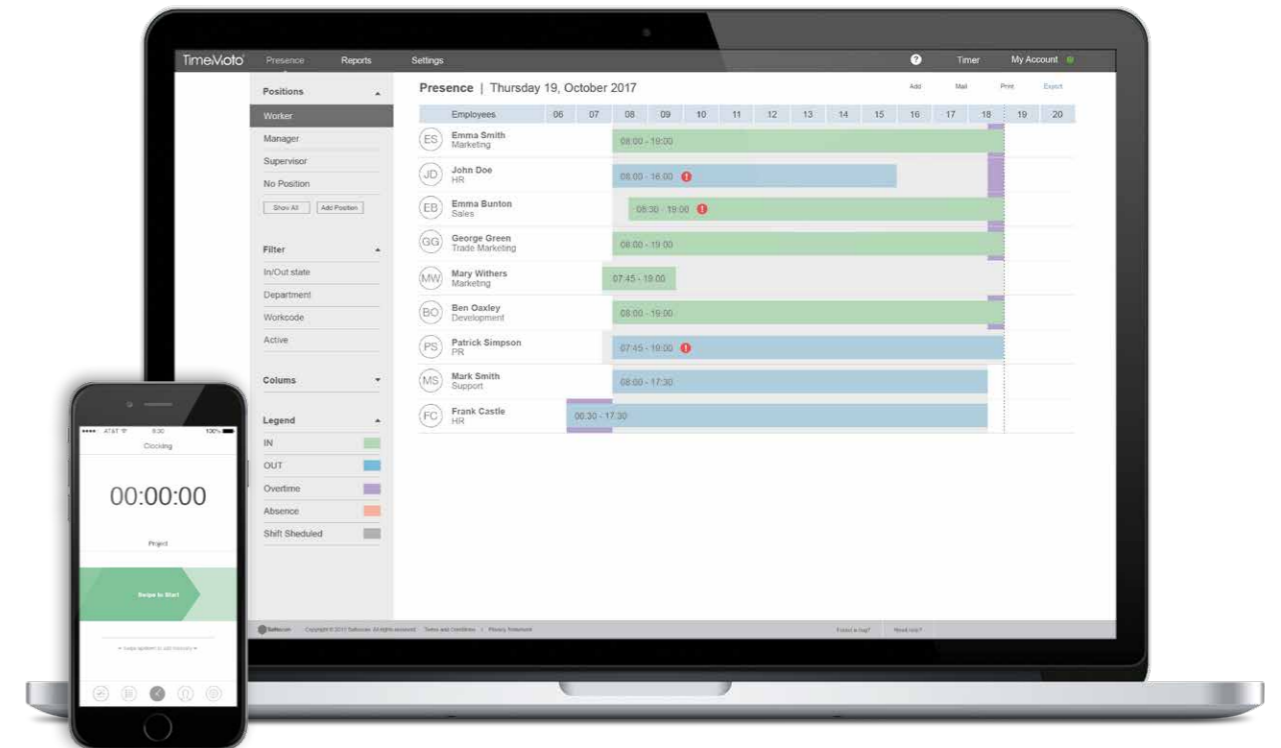

A PROVEN SOLUTION FOR COMPANIES IN:

- Construction
- Education
- Engineering
- Government
- Packaging
- Retail
- Healthcare
- Hospitality
- Logistics
- Manufacturing
- Transportation

TIMEMOTO SOFTWARE

EASY TIME & ATTENDANCE POWERED BY THE CLOUD

NOTHING TO INSTALL OR LICENSE

TimeMoto is software as a service that runs completely in the cloud. There's nothing to download, no servers to maintain, no router or firewall settings to change—just open your browser and go. You'll be up and running in minutes; no IT expertise required.

ENCRYPTED DATA, SECURE SERVERS

TimeMoto uses advanced security protocols to encrypt and store your data in our dedicated data centers. All information is encrypted before transfer and sent over a secure link. Our redundant storage protocol ensures you never lose data—not even if you lose your Internet connection. TimeMoto will store all new records on the local device until the connection is re-established.

LOW COST OF OWNERSHIP

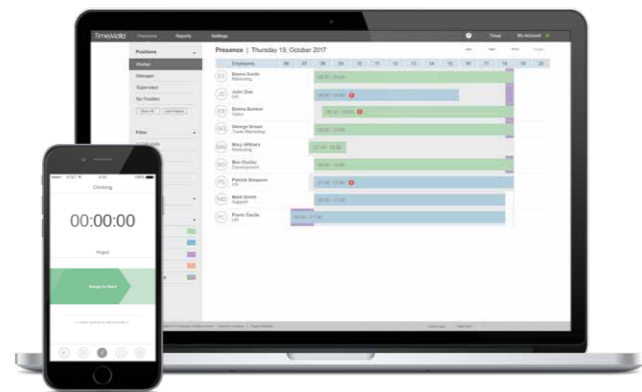

Because TimeMoto runs in the cloud, you don't need to buy expensive servers or pay set-up and networking fees. For one pay-as-you-go sub-subscription, TimeMoto securely collects and stores all your data in the cloud, where you have 24/7 access. What's more, you never have to buy an upgrade: you're always using the latest version.
