40H HANDHELD UV DETECTOR

IDENTIFY BANKNOTES' UV SECURITY FEATURES

Every modern banknote has integrated UV security features that only show up under ultraviolet light at a certain frequency. The Safescan 40H is designed specifically to help you verify these features and identify potentially counterfeit banknotes. Lightweight and compact, the battery-powered Safescan 40H is the perfect UV counterfeit detector wherever you need fast, portable banknote verification, such as at markets and events or in taxis and delivery vans.

- 4W UV lamp verifies the UV features in banknotes
- Powerful white LED flashlight for checking watermark and security strip
- Verifies credit cards, passports and other ID's
- Suitable for all currencies
- With wrist strap and handy foldable stand for desk use
- Also ideal for use with Safescan 20 UV security marker

Verifies UV features of credit cards and ID's

Verifies UV features of banknotes

White light to check watermark and metal thread in banknotes
